MENTORED PATIENT-ORIENTED RESEARCH CAREER DEVELOPMENT AWARD

The Lifeline Foundation and the National Heart, Lung and Blood Institute (NHLBI) wish to announce their joint sponsorship of the NHLBI Mentored Patient-Oriented Research Career Development Award (K23), which will provide supplemental funding for vascular surgeon scientists in the early stages of their research careers.

The purpose of the Mentored Patient-Oriented Research Career Development Award (K23) is to support the career development of investigators who have made a commitment to focus their research endeavors on patient-oriented research. The objectives of the Mentored Patient-Oriented Research Career Development Award (K23) are (1) to encourage research-oriented clinicians to develop independent research skills and gain experience in advanced methods and experimental approaches needed to conduct patient-oriented research and (2) to increase the pool of clinical researchers who can conduct patient-oriented studies, capitalizing on the discoveries of biomedical research and translating them to clinical settings.

The application deadline is **June 1, 2004**. For more information, contact the Lifeline Foundation at lifeline@vascularsociety.org or visit VascularWeb (<http://www.vascularweb.org/>).
